

Count target matches, not elapsed time

Anchor: (S, T) = (0, 0). Each draw below mismatches the source.

Raw time			
Complete draw (S, T)	(1, 1)	(1, 0)	(1, 0)
Positive increment Denominator = raw time	1	1/2	1/3
Target filter	Do not retain	Retain: first match	Retain: second match
Negative increment Denominator = retained rank	0	1	1/2
Signed increment	1	-1/2	-1/6

Block value: $1 - 1/2 - 1/6 = 1/3$.

One possible block; this is not an expected value.
